DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 14 and 17 - 22, drawn to a product comprising a soft magnetic member, classified in class 428, subclass 692+.
 - II. Claims 15 and 16, drawn to a method of making a soft magnetic member, classified in class 427, subclass 457+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as sputtering.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. In addition, ***in the event that Group I is elected***, the Examiner notes that this group contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 1773

Species i – claimed soft magnetic member requires a region having higher saturation flux density than other regions;

Species ii - claimed soft magnetic member requires a region having a higher Fe concentration than at least one other region;

Species iii - claimed soft magnetic member requires a compound which improves a magnetic coupling between a conductive metal layer and a soft magnetic layer supported by said conductive metal layer;

Species iv - claimed soft magnetic member requires that the following relationships hold: $5 \leq p/s < 10$ and $0 < s < 100 \text{ nm}$; and

Species v - claimed soft magnetic member requires that the following relationships hold: $4 \leq p/s \leq 15$ and $100 \text{ nm} < s \leq 1000 \text{ nm}$.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (from the 5 species listed above) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 1773

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. No telephone call was made to applicants due to the complexity of the restriction requirement. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
